

southern New England stumpage price report comments.
4th quarter 2011

Comments:

- 8' & 10' logs still "on hold" in most market scenarios, re: pricing not good...this affects w. pine sales unless one has the "good stuff" plus mostly longer logs to market. We are still waiting on "housing starts", since at least back to March 2007. How inspiring.
- Slow trend up in most prices, high demand for firewood.
- We are retired, no longer active. Would like to receive summary of results. Thank you.
- No purchase of stumpage for this period.
- Markets are still slow still on pine quota, 2 loads a week Irving.
