

Southern New England Stumpage Price Reporting

Second quarter, 2013 (April – June).

Comments:

- Nothing lately. Sawmills not working.
- No sales at this time of year.
- No timber lots bought this period. The state and MA MDC have stopped marking timber plus the price of logs is still very low.
- No purchase of stumpage for this period.
- We didn't buy any standing timber at all during this period either east or west.
- Hardwood market still very poor, pine market worse, firewood ok
- Not any more sawtimber work.
- Poor weather has kept markets solid. Lower logging capacity due to some loggers retiring, going elsewhere for work, etc. These prices are the new "normal".
