

## Southern New England Stumpage Price Reports.

Third Quarter 2014

### Comments:

1. Hardwood markets strong. Spruce market good and steady. Pine and Hemlock about the same.
2. I subtracted my commission from the stumpage prices to more accurately compare with industrial prices.
3. Oak went up to \$300 in early summer and then back down to \$200. Was as low as \$150 to going up to \$300.
4. It appears that hemlock and white ash will be glutting the market even more so in the near future. pestilence, pestilence
