

Southern New England Stumpage Survey

2026 – 1st Quarter Comments

Markets are stable at the moment, but many mills are full.

Very difficult to move red pine due to lack of Canadian Trailers

All species continue to decline as all costs increase. DCR continues to hold back from putting wood out, so it has forced our farming community to over pay for what little that is being offered.

Disappointing. Especially for White Pine and lower end hardwoods.

Poor all around.

Grade lumber prices haven't moved. RR ties are steady.
