

Southern New England stumpage price survey.

4th quarter 2010

Comments:

- Hdw seem to be moving good. W.pine I am put on a quota – 1 load per week, good thing I am mostly a hdw lot. Should be better year than last.
- Markets are very fragile
- Lumber activity picked up in the spring/summer as of Oct 1, 2010 – “dead”. Prices and shipments falling again
- Awful - I was paid better rates in 1974. Firewood is much better, though.
- up slightly (maybe 10%?)
- timber prices up to a degree.
-
