

Pine pulp market is non-existent.

All saw logs are moving well. Prices similar to last year. No pulp market.

Getting Stronger.

Markets strong, especially for hardwoods.

Trucking is a major limitation to white pine pricing. Oak shows signs of firming up in price.

Other HW=mat and tie logs.

There is a shortage of lumber due to cov-19. Mill productions are down supply and demand. Hard maple is strong the rest of species as well.
